

APPENDIX – USER STORIES

User Story 1: Browse Restaurent / Dishes

+ Add

Description

As a visitor, I want to browse traditional dishes by culture so that I can learn about global cuisines.

Acceptance Criteria:

- User can select a culture (e.g., Indian, Ethiopian) from a list based on the location.
- The platform displays a list of restaurants that offer traditional dishes for that culture

☒	GROUPJ-105 Create /foods/ API to list all foods	DONE ▾		=

User Story 2: Generate Food Stories

+ Add

Description

As a visitor, I want to read cultural stories about traditional meals or food so that I understand their background and significance.

Acceptance Criteria:

- Each dish page includes a short AI-generated cultural story.
- The story explains the origin, tradition, and cultural significance.

User Story 3: AI Recommendations

+ Add

Description

As a visitor, I want to search for food or cuisines in plain language so that it feels conversational and easy to use.

Acceptance Criteria:

- The user can type queries like "Where can I find Sri Lankan food in Auckland?"
- The platform returns AI-interpreted results with matching restaurants or dishes.
- LLM handles ambiguous or broad queries gracefully.

User Story 4: Recommend Restaurants

+ Add

Description

As a registered user, I want to receive restaurant recommendations based on my location and preferences so that I can easily find places I'd enjoy.

Acceptance Criteria:

- The user's current location is used (input manually for now).
- Past likes or reviews influence suggestions.
- The platform returns some restaurants sorted by cultural relevance and distance.

User Story 5: Mark Favourites

+ Add

Description

As a registered user, I want to mark restaurants as favourites so that I can keep track of places I like or want to visit.

Acceptance Criteria:

- Each restaurant page has a "Save to favourites" button.
- Favourites are viewable in the user's dashboard.
- Duplicate saving is prevented

User Story 6: Personalised Recommendations (based on History)

+ Add

Description

As a registered user, I want to receive personalized food and restaurant suggestions based on my reviews and interactions so that the platform feels tailored to me.

Acceptance Criteria:

- User history (e.g., reviews, searches, favourites) feeds into a personalised LLM prompt.

Linked work items

☒ GROUPJ-109 Design UI for displaying AI-based recommendations	IN PROGRESS ▾		=

User Story 7: Personalised Recommendations (Location and Cuisine)

+ Add

Description

As a user, I want to receive a multi-stop route of restaurants serving different cultural dishes so that I can plan a meaningful food journey.

Acceptance Criteria:

- User inputs a location and list of cuisines (e.g., “Wellington”, “Middle Eastern, African”).
- LLM returns 3–5 restaurant stops in logical order.
- Each stop includes dish, restaurant, address, cultural background.
- Route is viewable in list format, optionally mappable.

☒	GROUPJ-78 UI to display route	DONE ✓		=
☒	GROUPJ-111 Finalize /gravitas/route with route building and LLM prompt	DONE ✓		=
☒	GROUPJ-112 Create route preview UI with stops and dishes	DONE ✓		=

User Story 8: AI Content for Dishes and Restaurants

+ Add

Description

As a user, I want to see short summaries for dishes and restaurants so that I can decide quickly whether they interest me.

Acceptance Criteria:

- AI-generated summaries are shown on listings and detail pages.
- Summaries include style, origin, and top review points.
- Visible even without logging in.

Linked work items

☒	GROUPJ-106 UI for browsing dishes by culture	DONE ✓		=
-------------------------------------	---	--------	---	---

User Story 9: Reviews

+ Add

Description

As a user, I want to write reviews about restaurants and dishes so that I can share my experiences with others.

Acceptance Criteria:

- Each restaurant page has a review form.
- User can rate and write text.
- Reviews appear under the restaurant with timestamp and username.

☒ GROUPJ-80 Add review form UI	DONE ▾		=

User Story 10: Moderate Reviews

+ Add

Description

As a user, I want my review to be automatically checked for offensive or inappropriate content so that I follow the community guidelines.

Acceptance Criteria:

- Review passes through LLM moderation before saving.
- If flagged, the user receives a prompt to revise.
- Flags include spam, offensive tone, and irrelevant content.

Linked work items

+

relates to

☒ GROUPJ-114 Complete /moderate endpoint with LLM tone check	DONE ▾		=
☒ GROUPJ-79 Build LLM moderation service	DONE ▾		=

User Story 11: Suggest Restaurants

+ Add

Description

As a user, I want to ask food-related questions via a chat assistant so that I can quickly get recommendations or cultural insights.

Acceptance Criteria:

- User can input questions like "Where can I eat vegan Thai food?"
- Assistant responds using AI and local data.
- Answers include restaurant names, dishes, or cultural facts

User Story 12: View flagged Content (Admin)

+ Add

Description

As an admin, I want to view flagged reviews so that I can take appropriate action on abusive or inappropriate content.

Acceptance Criteria:

- Reviews with `is_safe: false` are marked in dashboard.
- Admin can approve, reject, or edit flagged reviews.
- Admin actions are logged

User Story 13: Restaurent & Dish Management

+ Add

Description

As an admin, I want to manage restaurant information and menus so that the data is accurate and complete.

Acceptance Criteria:

- Admin can edit the name, description, address, and categories.
- Duplicates can be merged or removed.
- Menus can be enriched or corrected.

User Story 14: Manually Generate Cultural Stories, Summary (Admin)

+ Add

Description

As an admin, I want to manually generate cultural stories or summaries for specific dishes or restaurants so that I can enrich the platform content.

Acceptance Criteria:

- Admin panel has a "Generate Summary" button.
- Prompt can be edited before generation.
- Preview appears before saving to DB.
